

Trishka Hornbeck –

As the parent of a third grader, it might seem odd that I am running for the Upper Campus seat, but I enrolled my child at GREEN with every intention of her graduating from GREEN, so I am dedicated to seeing EVERY campus thrive. This is our fourth year as a GREEN family so we have seen a lot of changes happen, but I am confident that GREEN will continue to shine as a top school in the state and I am confident that GREEN Schools can rise to even greater heights. This conviction is what has driven me to work so hard to be involved with the school. I volunteer at every opportunity; I am active with the Parent Volunteer Organization and now I hope to serve the school as a member of the Board.

While my work experience includes a range of industries from intellectual property law to now running a prosperous custom home building business with my husband, every role I've had hinged on my leadership skills. Even when I was in customer service jobs I did well because of my ability to listen and provide solutions. In the businesses my husband and I have owned together and throughout my professional life, I've realized I can't just sit back and let things happen. When something needs to be done, I'm the one to take the initiative and get things done.

In addition to my business experience, I have also worked with non-profit groups. Including co-founding a FIRST Robotics team and established the GREEN Charter School Parent Volunteer Organization of Greenville.

As a member of the Board, I would take seriously the success of all students, and I truly mean ALL students. As one who has been through the testing process for learning disabilities (dyslexia) and gifted and talented classes, I have personal empathy for non-mainstream classes. This includes the teachers that lead them, and the students that thrive because of them.
